National Substance Use and Mental Health Services Survey (N-SUMHSS), 2022: Codebook

Acknowledgements

This data file codebook was prepared for the Substance Abuse and Mental Health Services Administration (SAMHSA), under Contract No. 75S20320C00001 with SAMHSA, U.S. Department of Health and Human Services (HHS). Heydy Juarez served as the contracting officer representative.

Terms of Use

These data are distributed under the following terms of use; by continuing past this page, you signify agreement to comply with the requirements below:

Privacy of Study Respondents

Any intentional identification of an individual or organization, or unauthorized disclosure of identifiable information, violates the promise of confidentiality given to the providers of the information. Disclosure of identifiable information may also be punishable under federal law. Therefore, users of data agree to:

Use these data sets solely for research or statistical purposes, and not for investigation or re-identification of specific individuals or organizations.

Make no use of the identity of any individual discovered inadvertently, and report any such discovery to SAMHSA (BHSISHelpdesk@hendall.com)

Public Domain Notice

All material appearing in this document is in the public domain and may be reproduced or copied without permission from SAMHSA. Citation of the source is appreciated. However, this publication may not be reproduced or distributed for a fee without specific, written authorization of the Office of Communications, SAMHSA, HHS.

Authors that use these data are encouraged to send citations of their publications to SAMHSA for inclusion in a database of related work (BHSISHelpdesk@hendall.com)

Disclaimers

Data users acknowledge that SAMHSA bears no responsibility for use of the data or for interpretations or inferences based upon such uses.

The Substance Abuse and Mental Health Services Administration (SAMHSA) complies with applicable Federal civil rights laws and does not discriminate on the basis of race, color, national origin, age, disability, religion, or sex (including pregnancy, sexual orientation, and gender identity). SAMHSA does not exclude people or treat them differently because of race, color, national origin, age, disability, religion, or sex (including pregnancy, sexual orientation, and gender identity).

Violations

If SAMHSA determines these terms of use agreements have been violated, possible sanctions include:

- report of the violation to the Research Integrity Officer, Institutional Review Board, or Human Subjects Review Committee of the user's institution;
- report of the violation to the Federal Office for Human Research Protections, if the confidentiality of human subjects has been violated;
- report of the violation of federal law to the United States Attorney General for possible prosecution;
- court-awarded payments of damages to any individual(s) or organization(s) harmed by the breach of confidential data.

Description of the National Substance Use and Mental Health Services Survey (N-SUMHSS)

For more than two decades, the Substance Abuse and Mental Health Services Administration (SAMHSA) has been collecting data on the substance use and mental health services offered by treatment facilities across the United States. In previous years, facilities reported their service offerings using two surveys—the National Survey of Substance Abuse Treatment Services (N-SSATS) and the National Mental Health Services Survey (N-MHSS). In 2021, the N-SSATS and the N-MHSS were combined into one survey—the National Substance Use and Mental Health Services Survey (N-SUMHSS). The goal of combining N-SSATS and N-MHSS was to reduce the burden on the facilities offering both substance use and mental health services, reduce the use of government resources to collect data, and increase the rate at which data can be produced by implementing one streamlined survey effort.

The 2022 N-SUMHSS was conducted from March 2022 through December 2022. The N-SUMHSS collects information from all known facilities in the United States, both public and private, that provide substance use and/or mental health treatment services.¹

The Center for Behavioral Health Statistics and Quality (CBHSQ) of the Substance Abuse and Mental Health Services Administration (SAMHSA), U.S. Department of Health and Human Services, plans and directs the N-SUMHSS.

The N-SUMHSS provides a mechanism for quantifying the diverse characteristics and composition of the U.S. substance use and mental health treatment delivery systems. The N-SUMHSS is designed to collect data on the location, characteristics, and utilization of organized substance use and mental health treatment services for facilities within the scope of the survey across the United States, its territories, and the District of Columbia.²

The N-SUMHSS collects multipurpose data that can be used to:

- Assist SAMHSA and state and local governments in assessing the nature and extent of services provided in state-supported, state-operated, and private non-profit and for-profit substance use and mental health treatment facilities, and in forecasting substance use and mental health treatment resource requirements;
- Update SAMHSA’s Inventory of Substance Use and Mental Health Treatment Facilities (I-TF), an inventory of all known substance use and mental health treatment facilities in the United States, its territories, and the District of Columbia, which can be used as a foundation for future surveys of these facilities;
- Describe the nature and scope of substance use and mental health treatment services and conduct comparative analyses about the nation, regions, and states;

¹ In the 2022 N-SUMHSS report, entities responding to the N-SUMHSS are referred to as “facilities.”

² In the 2022 N-SUMHSS, territories included American Samoa, Guam, the Federated States of Micronesia, the Commonwealth of the Northern Mariana Islands, Palau, Puerto Rico, and the U.S. Virgin Islands.

- Generate the National Directory of Drug and Alcohol Use Treatment Facilities, a compendium of facilities approved by state substance use agencies for the provision of substance use treatment;
- Generate the National Directory of Mental Health Treatment Facilities; and
- Update the information in SAMHSA’s online FindTreatment.gov, a searchable database of public and private facilities for the provision of substance use and mental health treatment. FindTreatment.gov is available at <https://findtreatment.gov>.

Data Collection Procedures for the 2022 N-SUMHSS

Field period and reference date

The field period for the 2022 N-SUMHSS, which included mailing and data collection operations, ran from March 31, 2022, through December 4, 2022. The reference date was March 31, 2022.

Survey Universe

The survey universe for the 2022 N-SUMHSS included 31,010 facilities across the United States, its territories, and the District of Columbia, of which 5,945 were found to be either closed or ineligible. Out of 25,065 facilities eligible for inclusion in the 2022 N-SUMHSS, 17,353 facilities provided substance use treatment services, 11,647 provided mental health treatment services, and 3,935 facilities provided both substance use and mental health treatment services.^{3,4}

Below are the major activities undertaken to make sure SAMHSA has the most complete and accurate universe of facilities possible:

- The survey database is updated to be composed of (1) those facilities that were included in the most recent survey and are in-scope, and (2) newly identified facilities that became known during the previous survey collection and are identified as eligible. Facilities that closed or were subsequently found to be out-of-scope are excluded.
- State mental health authorities (SMHAs) and state substance abuse agencies (SSAs) are contacted annually and asked to either (1) update and edit their state listing of known facilities, or (2) submit a new state listing of known facilities, using the I-TF online. The information collected through these state listings is processed and cross-checked with the database of facilities in the I-TF; newly identified facilities are screened for eligibility before being added to the survey database.
- Current facility listings are compiled annually from Data Axle (formerly the American Business Index [ABI]), and the American Hospital Association (AHA). These listings are cross-checked against the existing I-TF database. Any new facilities are screened through an augmentation telephone questionnaire to determine their eligibility for inclusion in the N-SUMHSS data collection process. The augmentation screener is also used to screen facilities that were newly identified through the previous survey and through the state listings.

When new, eligible facilities are identified between surveys, they are contacted by telephone to provide basic facility information for a “between survey update.” Facilities that meet the requirements of being active, providing substance use and/or mental health treatment services as defined by SAMHSA, and responding to the annual N-SUMHSS survey are listed on

³ Facility counts are not mutually exclusive because facilities offering both substance use and mental health treatment services are included in substance use and mental health facility counts.

⁴ Counts by type of facility reported here will not match those included in the frequencies for the FOCUS variable because reported counts are based on I-TF status and not on survey response to survey question one.

SAMHSA's FindTreatment.gov, in the National Directory of Mental Health Treatment Facilities and in the National Directory of Drug and Alcohol Abuse Treatment Facilities.

Survey coverage

The following types of substance use and mental health treatment facilities were included in the 2022 N-SUMHSS:

- *Psychiatric hospitals* are facilities licensed and operated as either state/public psychiatric hospitals or as state-licensed private psychiatric hospitals that primarily provide 24-hour inpatient care to persons with mental illness. They may also provide 24-hour residential care and/or less-than-24-hour care (i.e., outpatient, partial hospitalization/day treatment), but these additional service settings are not requirements.
- *General hospitals with a separate inpatient substance use and/or psychiatric unit* are licensed general hospitals (public or private) that provide inpatient substance use and mental health services in separate units. These units must have specifically allocated staff and space for the treatment of persons with substance use problems and/or mental illness. The units may be located in the hospital itself or in a separate building that is owned by the hospital.
- *State hospitals* are hospitals funded and operated by the government of a state.
- *Veterans Affairs (VA) medical centers* are facilities operated by the U.S. Department of Veterans Affairs, including general hospitals with separate substance use and/or psychiatric inpatient units, residential treatment programs, and/or outpatient clinics.
- *Certified community behavioral health clinics* are responsible for directly providing (or contracting with partner organizations to provide) nine types of services, with an emphasis on the provision of 24-hour crisis care, utilization of evidence-based practices, care coordination, and integration with physical health care.
- *Partial hospitalization/day treatment facilities* provide only partial day substance use and mental health services to ambulatory clients, typically in sessions of three or more hours on a regular schedule.
- *Outpatient facilities* provide only outpatient substance use and/or mental health services to ambulatory clients, typically for less than three hours at a single visit. The services may include detoxification, methadone and/or buprenorphine treatment.
- *Residential treatment centers (RTCs) for children* are facilities not licensed as psychiatric hospitals that primarily provide individually planned programs of mental health treatment in a residential care setting for children under age 18 years. (Some RTCs for children may also treat young adults.) RTCs for children must have a clinical program that is directed by a psychiatrist, psychologist, social worker, or psychiatric nurse who has a master's or doctoral degree.
- *Residential treatment centers (RTCs) for adults* are facilities not licensed as psychiatric hospitals that primarily provide individually planned programs of mental health treatment in a residential care setting for adults.

- *Multi-setting mental health facilities*⁵ provide mental health services in two or more service settings (non-hospital residential, plus either outpatient and/or partial hospitalization/ day treatment), and are not classified as a psychiatric hospital, general hospital, medical center, or residential treatment center.
- *Community mental health centers* (CMHCs) provide either (1) outpatient services, including specialized outpatient services for children, the elderly, individuals who are chronically mentally ill, and residents of its mental health service area who have been discharged from inpatient treatment at a mental health facility; (2) 24-hour emergency care services; (3) day treatment or other partial hospitalization services, or psychosocial rehabilitation services; or (4) screening for patients being considered for admission to state mental health facilities to determine the appropriateness of the admission. To be classified as a CMHC, a facility must meet applicable licensing or certification requirements for CMHCs in the state in which it is located.
- *Other types of residential treatment facilities* refer to facilities not licensed as psychiatric hospitals. The primary purpose of other types of residential treatment facilities is to provide individually planned programs of mental health treatment services in a residential care setting; such facilities are not specifically for children or adults only.
- *Other* refers to another type of hospital or mental health facility not defined in the categories above.

Exclusions

The survey universe for the 2022 N-SUMHSS excluded: (1) Department of Defense (DoD) military mental health treatment facilities; (2) individual private practitioners or small group practices not licensed as a substance use and/or mental health clinic or center; and (3) jails or prisons.

Mental health facilities are not eligible for inclusion in the survey universe if they do not fall under at least one of the categories specified under *Survey Coverage* and only provide one or more of the following services: crisis intervention services, psychosocial rehabilitation, cognitive rehabilitation, intake, referral, mental health evaluation, health promotion, psychoeducational services, transportation services, respite services, consumer-run/peer support services, housing services, or legal advocacy. Residential facilities whose primary function is not to provide specialty mental health treatment services are also not eligible for inclusion in the survey universe for the N-SUMHSS.

Beginning in 2000, halfway houses that did not provide substance use treatment were included in the I-TF and in survey universe so that they could be listed in the National Directory of Drug and Alcohol Abuse Treatment Facilities and on SAMHSA's FindTreatment.gov (<https://findtreatment.gov>). These facilities are excluded from analyses and public use data files.

Content

The 2022 N-SUMHSS questionnaire contained 68 numbered questions (see SAMHSA.gov for an [online version](#) of the questionnaire). The survey consisted of two introductory questions and four separate modules. The introductory questions requested information on the primary

⁵ The classification of psychiatric hospital, general hospital, medical center, or residential treatment center—any of which can offer mental health services in two or more service settings—takes precedence over a multi-setting classification.

treatment focus of the facility and whether the facility was a jail. These two questions indicated which sections of the survey each facility would be asked to complete. Facilities providing both substance use and mental health treatment services were asked to complete all four modules, while those providing only substance use were asked to complete Modules A, C, and a portion of Module D. Mental health treatment facilities that did not also offer substance use treatment services were asked to complete Modules B, C, and a portion of D. In addition, facilities operated by the Department of Veteran's Affairs (VA) were asked to complete additional questions regarding VA services offered. These addenda included an additional seven questions for substance use facilities and twelve questions for mental health facilities.

Introductory topics included:

- primary treatment focus;
- jail, prison, or detention center status.

Topics included in the substance use portion of the survey (Module A) included:

- substance use treatment services available;
- detoxification from alcohol, benzodiazepines, opioids, cocaine methamphetamines, or other drugs and routine use of medication during detoxification;
- type of care provided, i.e.;
 - outpatient treatment services (regular outpatient treatment, intensive outpatient treatment, day treatment or partial hospitalization, detoxification, methadone/buprenorphine maintenance or naltrexone treatment),
 - residential (non-hospital) treatment services (long-term—more than 30 days, short-term—30 days or fewer, detoxification), and
 - hospital inpatient treatment services (inpatient treatment, inpatient detoxification);
- treatment services offered (assessment and pre-treatment services, medical services, recovery support services, education and counseling services, pharmacotherapies, testing, transitional services, ancillary services, and other services);
- treatment available for opioid use disorder;
- treatment available for alcohol use disorder;
- clinical therapeutic approaches;
- provision of treatment services in sign language and/or in languages other than English;
- special programs or groups provided for specific client types;
- licensure, certification, or accreditation agencies or organizations;
- payment type or insurance accepted;

Topics in the mental health portion of the survey (Module B) included:

- services offered;
- type of care provided, i.e.;

- 24-hour hospital inpatient,
 - 24-hour residential,
 - partial hospitalization/day treatment, and
 - outpatient treatment services;
- type of mental health facility (e.g., psychiatric hospital, separate inpatient unit of a general hospital, state hospital, residential treatment center for children, etc.);
- treatment modalities for mental health treatment;
- use of antipsychotics and type of medications used;
- services offered (intensive case management, court-ordered treatment, integrated primary care services, education services, suicide prevention services, etc.);
- age groups accepted for treatment;
- special programs or groups provided for specific client types;
- availability of emergency psychiatric services;
- provision of treatment services in sign language and/or in languages other than English;
- quality improvement practices;
- use of seclusion or restraint;
- payment types or insurance accepted;
- licensure, certification, or accreditation agencies or organizations;

Topics in the treatment facility information portion of the survey (Module C) included:

- Federally Qualified Health Center (FQHC) status;
- facility operating entity;
- religious or faith-based organization affiliation;
- facility smoking and vaping policies;
- payment and fee information;
- listing preferences for SAMHSA's online FindTreatment.gov and Directory;
- parent organization information, if applicable;

Topics in the client counts portion of the survey (Module D) included:

- number of facilities included in the counts;
- number of clients receiving inpatient, residential, and outpatient substance use disorder treatment services on March 31, 2022;
- number of inpatient and residential beds designated for substance use disorder treatment on March 31, 2022;
- number of clients in treatment for use of 1) both alcohol and substances other than alcohol; 2) only alcohol; 3) only substances other than alcohol;

- percentage of substance use clients with diagnosed co-occurring mental disorder and substance use disorder;
- number of substance use disorder treatment admissions for the most recent 12-month period;
- number of clients receiving inpatient, residential, and outpatient mental health treatment on March 31, 2022;
- number of inpatient and residential beds designated for mental disorder treatment on March 31, 2022;
- number of mental disorder treatment admissions, readmissions, and incoming transfers between April 1, 2021, and March 31, 2022;
- percentage of total admissions that were military veterans.

Data collection

There were three data collection modes employed: a secure web-based questionnaire, a paper questionnaire sent by mail, and a computer-assisted telephone interview (CATI). Approximately three weeks before the survey launch date (March 31, 2022), SAMHSA mailed letters to the attention of the facility directors of all eligible facilities to alert them to expect the survey and to request their participation in the N-SUMHSS. The letter also served to update records with new address information received from the U.S. Postal Service. A data collection packet (including a SAMHSA cover letter, a state-specific letter of support, information on completing the survey on the web, and a fact sheet of frequently asked questions) was mailed to each facility on March 31, 2022. The web-based survey also became available at the same time. At this point, each facility had the option of completing the questionnaire via the secure survey website or asking for a paper questionnaire to complete and return via postal mail. In August 2022, another similar packet was sent to non-responding facilities, this time including a copy of the questionnaire, a definitions packet, and a postage-paid return envelope.

During the data collection phase, contract personnel were available by telephone to answer facilities' questions concerning the survey. Facilities completing the questionnaire on the Internet had access to hyperlinks to an information site containing definitions of the survey elements. Multiple reminder letters were sent to non-respondents over the course of the data collection period via mail and e-mail. To increase the survey response rate, state substance use and mental health agency representatives were contacted during the data collection period to inform them of their state's progress and to request additional help in encouraging responses. CATI follow-up (assisted telephone interviews) of non-respondents began in July 2022 and ended in November 2022.

Eligibility and unit response rate

Table 1.1 presents a summary of eligibility and response rate information. Of the 15,624 mental health treatment facilities in the survey, 25.5 percent were found to be ineligible for the survey because they did not provide mental health treatment services; had a primary treatment focus of substance use services or general health care; provided treatment for incarcerated persons only (i.e., in jails or prisons); were an individual or small group mental health practice not licensed or certified as a mental health center or clinic; or were closed. Of the 20,898 substance use treatment facilities in the survey, 17.0 percent were found to be ineligible for the survey because they had closed or did not provide substance use treatment or detoxification.

Table 1.1. N-SUMHSS treatment facilities by status, mode of response, and type of facility: 2022

	Substance Use Facilities		Mental Health Facilities		Combined Substance Use and Mental Health Facilities ¹	
	N	%	N	%	N	%
Total facilities in survey	20,898	100.0	15,624	100.0	5,512	100.0
Closed or ineligible	3,545	17.0	3,977	25.5	1,577	28.6
Eligible	17,353	83.0	11,647	74.5	3,935	71.4
Total eligible	17,353	100.0	11,647	100.0	3,935	100.0
Non-respondents	2,283	13.2	1,995	17.1	621	15.8
Respondents	15,070	86.8	9,652	82.9	3,314	84.2
Excluded from report²	44	0.3	--	--	7	0.2
Roll-ups³	172	1.0	66	0.6	27	0.7
Eligible for report	14,854	85.6	9,586	82.3	3,280	83.4
Mode of response	14,854	100.0	9,586	100.0	3,280	100.0
Internet	14,590	98.2	9,459	98.7	3,246	99.0
Mail	146	1.0	77	0.8	25	0.8
Telephone	118	0.8	50	0.5	9	0.3

¹ Facility counts and percentages are not mutually exclusive because facilities offering both substance use and mental health treatment services are included in substance use and mental health facility counts. Therefore, caution should be exercised while adding, comparing, or interpreting counts and percentages across facility types.

² Facilities excluded from the substance use counts included 22 non-treatment halfway houses, 4 solo practices not approved by the state agency for inclusion.

³ Facilities whose client counts were included in or “rolled into” other facilities’ counts and whose facility characteristics were not reported separately.

SOURCE: Center for Behavioral Health Statistics and Quality, Substance Abuse and Mental Health Services Administration, National Substance Use and Mental Health Services Survey (N-SUMHSS) 2022.

Facility Reporting and Selection for the 2022 N-SUMHSS Report

Of the 11,647 mental health facilities eligible for the survey, 9,652 (82.9 percent) completed the survey, including 66 facilities whose client counts were included in or “rolled into” other facilities’ counts and whose facility characteristics were not reported separately [Table 1.1]. (These 66 facilities were excluded from the report). After excluding the roll-up of 66 mental health facilities, 9,586 eligible respondent mental health facilities were included in the 2022 N-SUMHSS report. Of the respondents that were eligible for the report, 98.7 percent completed the survey on the web, 0.8 percent through the mail, and 0.5 percent on the telephone.

Of the 17,353 substance use facilities eligible for the survey, 15,070 (86.8 percent) completed the survey, including 22 facilities that were halfway houses that did not provide substance use treatment, 4 facilities that were solo practitioners, and 18 facilities that provided administrative services only. These 44 facilities were excluded from the report but have been included in SAMHSA’s online FindTreatment.gov. In addition to the facilities that were excluded from the report, there were 172 substance use facilities whose client counts were included in or “rolled into” other facilities’ counts and whose facility characteristics were not reported separately [Table 1.1]. After excluding the 44 out-of-scope substance use facilities and the roll-up of 172 substance use facilities, 14,854 eligible respondent substance use facilities were included in the 2022 N-SUMHSS report. Of the respondents that were eligible for the report, 98.2 percent completed the survey on the web, 1.0 percent through the mail, and 0.8 percent on the telephone.

Of the mental health and substance use facilities eligible for the survey, 3,935 provided both mental health and substance use services. 3,314 (84.2 percent) of these completed the survey, including 7 whose mental health or substance use responses were excluded from the report and 27 whose client counts were included or “rolled into” other facilities’ counts and whose facility characteristics were not reported separately. After the exclusion of these facilities, 3,280 eligible respondent facilities providing both mental health and substance use services were included in the 2022 N-SUMHSS report. Of these, 99.0 percent completed the survey on the web, 0.8 percent through the mail, and 0.3 percent on the telephone.

Quality Assurance

All completed mail questionnaires underwent a manual review for consistency and missing data. Calls to facilities clarified questionable responses and obtained missing data. After data entry, automated quality assurance reviews were conducted on all survey response data. The reviews incorporated the rules used in manual editing in addition to consistency checks not readily identified by manual review.

Response Rates

The final unit response rate among facilities eligible for the survey was 88.0 percent.

Data Considerations and Limitations

As with any data collection effort, certain procedural considerations and data limitations must be considered when interpreting data from the 2022 N-SUMHSS. Some general issues are listed below. Considerations and limitations of specific data items are discussed where the data are presented.

- The N-SUMHSS is a voluntary survey, and while every effort is made to obtain responses from all known substance use and mental health treatment facilities within the scope of the survey, some facilities did not respond. There was no adjustment for the 12 percent facility non-response.

- The N-SUMHSS is a point-prevalence survey. It provides information on the substance use and mental health treatment system and its clients as of a pre-selected reference date (March 31, 2022). Client counts reported here do not represent annual totals. Rather, the N-SUMHSS provides a snapshot of substance use and mental health treatment facilities and clients on an average day or month.
- Multiple responses were allowed for certain questionnaire items (e.g., services provided in non-English languages and type of payment or insurance accepted for treatment services). Tabulations of data for these items include the total number of facilities reporting each response category.
- Reported client count totals that fell within a variance of +/- 10 and client percentages that fell within a variance of +/- 5 were not adjusted. Therefore, the public use file includes percentage values of greater than 100.
- The N-SUMHSS is an integration of the legacy N-SSATS and N-MHSS surveys. The creation of a single survey instrument introduced a data validation issue with the way facilities responded to Questions 1, 1a, A1, A1a, and B1 where respondents were asked about the type of services offered. Some facilities would only accept patients for either mental health or substance use treatment services. However, if that patient had a co-occurring substance use or mental health need outside of their intake diagnostic requirement, they would be offered treatment at that facility as well. For these facilities that will only accept either substance use or mental health clients, but will offer co-occurring treatment, a data change was made to accurately reflect their primary mode of treatment.
- The integration of the N-SSATS and the N-MHSS surveys also introduced the possibility of duplicate records for facilities that had previously completed each survey and beginning in 2021 were now only asked to complete the N-SUMHSS once. Facility information was carefully reviewed to ensure unduplicated information, but it is possible that duplicate facilities with updated contact information were not identified.

FREQUENCIES
